

# 13 Essentials

Nano Scale Silica + 12 Nutrients  
Balanced Foliar Feed System

13Essentials is a balanced formulation of nano-scale silica and 12 essential nutrients needed for proper plant growth.

2 OZ

Highly concentrate, making up to 12 gallons for optimal plant improvement and growth.

## Directions:

Shake bottle well. Mix 5 ml per gallon of water. Apply via mist sprayer/fogger to the upper and lower sides of the leaf. For best results, apply every 7 days. Apply during vegetative and early flowering period.

## Seed Treatment:

Soak seeds in mixture up to 24 hours or until tap root is visible. Soaking times may vary. This allows the Nanoparticles to penetrate the seed shell and excite the embryo faster than conventional soaking, resulting in stronger seedlings.

## Caution:

Certified Non-Toxic. Keep out of reach of children. In case of accidental exposure, flush with plenty of water. Personal Protective Equipment (PPE) including glasses / eye protection recommended.

## Storage:

Room temperature away from direct light.
